

Ode to Slot Cars

E

Friday night comes work over for the week
Got to chill out, catch some action, feel some heat
Where can you go, what can you see?
Some head for town, others the TV
Many choices now, free to air or sky
Or maybe its XBox, Playstation get that will you high
There's Rally Racing Games and now Gran Turismo 4
But nothing can ever beat lying on the floor...

Slot car racing,
We're going slot car racing
It really is the most underrated form of motor sport racing

You can get them in yellow you can get them, in blue
Or in formula 1 or an Audi TT in Silver too
Race in pairs or race them in fours or join them together get 8 tracks or more
Don't need no software don't need no TV'
Don't need no virtual reality
Just clear the lounge shift the stereo
Move the china cabinet and you're ready to go...

Slot car racing is the best place to learn
To be a great driver and not be a road germ
The best racing drivers in most people's view
Learnt to drive in go-carts but that's just not true
Schumacher, Possum Bourne, Jackie Stewart, Chris Amon
Caught the racing bug by racing slot cars back at home
This world would be a better place I tell it's a fact
If every Friday night we'd set up our Scalextric tracks...

Bridge

Those little cars go really fast spin off the track have a really big crash
Your hands are sweaty your heart racing can you beat the other guy through the
chicane, through the chicane ...
